B. Significant Accounting Policies:

1.5.1 Basis of Preparation of Financial statements:

The financial statements have been prepared to comply, in all material respects, with the generally accepted accounting policies in India. These financial statements have been prepared under the historical cost convention (as modified for investments, which are marked to market) on an accrual basis, except as otherwise stated. The significant accounting policies are in accordance with the accounting policies generally accepted in India.

The Financial Statements of the scheme have been prepared in accordance with Schedule VII of PFRDA Pension Fund Regulation 2015.

1.5.2 Use of Estimates:

The preparation of Financial Statements requires the Management to make estimates and assumptions considered in the reported amounts of assets and liabilities as of the date of financial statements and the reported income and expenses during the reporting period. Management believes that the estimates used in preparation of the financial statements are prudent and reasonable. Future results could differ from those estimates and are given effect to in the year in which those are crystallized.

1.5.3 Accounting of Unit Capital:

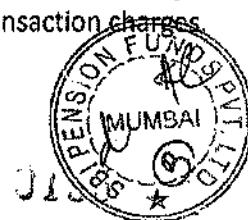

Units are created and redeemed based on the intimation provided by Central Record Keeping Agency (CRA) which is net of charges as provided in the National Pension System offer document and the Investment Management Agreement. All the units are recorded at face value of Rs. 10/- each.

1.5.4 Unit Premium Reserve:

When units are issued or redeemed the net premium or discount to the face value is transferred to the Unit Premium Reserve.

1.5.5 Investments:

- (i) The investments are undertaken as per the guidelines specified in the InvestmentManagement agreement with respect to the individual schemes.
- (ii) Purchase and sale of investments are recorded as on the trade date at cost and sale price respectively.
- (iii) Rights/bonus entitlements if any are accounted on ex-right/ex-bonus bonus date of the principal stock exchange.
- (iv) The holding cost of investments is determined by the weighted average cost method and the cost does not include brokerage and other transaction charges.

(v) **Valuation of Investments**

- The investments under the schemes are marked to market and carry investments in the financial statements at market value. Unrealised Gain / Loss, if any arising out of appreciation / depreciation in value of investments is transferred to Revenue Account.
- As per the directives issued by the PFRDA the valuation of investments is carried out by the Stock Holding Corporation of India Limited (SHCIL) as centralized valuation provider appointed by NPS and provided to SBIPF on a daily basis. Any deviations from the guidelines issued by PFRDA are mentioned in point '1.5.6'.

a) **Equity**

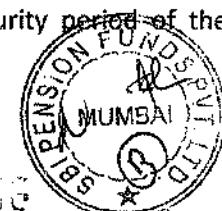

- 1 Equity traded on valuation day (Actively Traded equity): Where a security is traded on any stock exchange on a particular valuation day, the last quoted closing price at which it was traded on the selected stock exchange, as the case may be, may be used (Closing prices from BSE/NSE for the day).
- 2 Equity not traded on valuation day (Thinly traded equity): When a security is not traded on any stock exchange on a particular valuation day, the last quoted closing price at which it was traded on the selected stock exchange, as the case may be, on the earliest previous day may be used provided such date is not more than thirty days prior to valuation date.

b) **Debt Securities other than Government Securities**

- 1 Debt securities other than Government securities with a residual maturity over 60 days are valued at weighted average traded price on that day. When such securities are not traded on a particular day, they are valued on a yield to maturity basis, by using spreads over risk free benchmark yield obtained from agencies entrusted for the said purpose, by association of mutual fund in India (AMFI) to arrive at the yield for pricing the security.
- 2 Debt securities other than Government securities with a residual maturity upto 60 days are valued at weighted average traded price on that day. When such securities are not traded on a particular day, they are valued at last valuation price plus the difference between the redemption value and last valuation price, spread uniformly over the remaining maturity period of the instrument. In case of floating rate securities with floors and caps on coupon rate and residual maturity of upto 60 days, then those shall be valued on amortisation basis, taking the coupon rate as floor.

c) **Government Securities**

- 1 Central Government securities are valued at the aggregated prices received from independent valuation agencies.
- 2 State Government securities with a residual maturity over 91 days are valued at the aggregated prices received from independent valuation agencies. State Government securities with a residual maturity upto 91 days are valued at last valuation price plus the difference between the redemption value and last valuation price, spread uniformly over the remaining maturity period of the instrument.

d) Mutual Fund Units

Mutual Fund Units are valued based on the net assets values of the preceding day of the valuation date.

1.5.6 The valuation Policy of the Scheme, as advised by SHCIL, is at variance with PFRDA guidelines. The details of the variation are as under:

PFRDA Guidelines:	Valuation Policy:
1. Securities traded at a stock exchange: Debt securities (other than government securities) are valued at the last quoted closing price on the Principal exchange on which the security is traded.	Debt securities (other than government securities) are valued at the NSE weighted average traded price on that day.
2. Securities not traded at a stock exchange: When a debt security (Other than government Security) is not traded on any stock exchange on a particular valuation date, the value at which was traded on any other stock exchange on the earliest previous day is used, provided that such day is not more than 15 days.	a. With residual maturity over 60 days are valued on a yield to maturity basis, based on average of spreads provided by CRISIL and ICRA. b. With residual maturity up to 60 days are valued at last traded price plus the difference between the redemption value and last traded price, spread uniformly over remaining maturity period of the instrument.
3. Valuation of G-sec at YTM based on prevailing market prices.	Government securities are valued at average price provided by SHCIL (CRISIL and ICRA).
